Mr. Jerry Fleming
ANACONDA COPPER COMPANY
P.O. Box 638
Grants, New Mexico 87020

Re: Council Meeting - July 21, 1981

Dear Mr. Fleming:

This will confirm our telephone conversation today concerning Anaconda's scheduled presentation on Tuesday, July 21, 1981, before the Pueblo of Laguna Council. The Company is scheduled for 1 o'clock p.m. on that day.

Concerning the provision of data to the Pueblo so that we may assess the potential for future development on and near the Jackpile-Paguate area, please have definite answers ready for the Council. Several requests have been made to Mr. Earl Arlin and each time we have received assurances that work is being accomplished on our request and that a response would be forthcoming shortly. I'm sure that the question will come up. As I mentioned to you, the Pueblo would like to make its own determinations of ore reserves in place. It is important that the Pueblo have all the facts prior to negotiating a final reclamation plan, and while providing input into the Environmental Impact Statement.

I'll be on vacation on the day you'll be meeting with Council. I'm sure the meeting will be enlightening.

Sincerely,

PUEBLO OF LAGUNA
